SUMMARY

AI Automation Engineer with **2 years** of industry experience connecting LLM systems to real engineering workflows — CI/CD telemetry, test automation, log analysis, incident routing, and root-cause assistance — on complex distributed 4G/5G Open RAN systems. Builds autonomous AI agents in Python with LangChain, retrieval/vector search, MCP-style tool integration, and API workflows, on a strong foundation of conventional automation engineering (PyTest, Robot Framework, Jenkins, Linux). M.Sc. Information Systems & AI (GPA 93), **NVIDIA AI Infrastructure** and **IBM Generative AI & LLMs** certified.

EXPERIENCE

Parallel Wireless — AI Automation Engineer	09.2024 – present · 2 years
- Built and shipped 3 autonomous AI agents (Python, LangChain, MCP, FAISS) into production. - Own AI delivery end to end: framing, data, retrieval, evaluation, serving, deployment, monitoring. - Designed retrieval and tool-calling so agents query context and trigger real actions. - Added human-in-the-loop review and guardrails on agent outputs. - Applied HuggingFace transformers for log summarization and failure classification. - Built evaluation datasets and regression suites to track agent behavior over time. - Integrated agents over REST, WebSocket, and JSON events into Jenkins and internal tooling. - Ran agent and ML workloads on Docker/Kubernetes with GPU/CUDA across a 20+ server lab. - Reduced manual triage: agents summarize CI logs, classify failures, and route incidents. - Built PyTest/Robot Framework automation across 200–500 test cases. - Contributed to an 8h → 2h (~75%) build-to-deploy reduction in Jenkins/Groovy CI/CD. - Iterated with prompt engineering and error analysis; used Claude Code and Cursor.	

EDUCATION

M.Sc., Information Systems & AI • University of Haifa	GPA 93 • Expected 2027
Specialization in Artificial Intelligence, Machine Learning, Deep Learning, NLP, Big Data Systems, and Software Engineering; research-oriented coursework with applied projects.	
B.Sc., Computer Science • Ruppin Academic Center	GPA 83 • 2022 – 2025
Specialization in AI & Data Science. Coursework in Software Development, Data Science, Machine Learning, and Deep Learning; strong OOP, data structures, algorithms, and databases.	

CERTIFICATIONS

NVIDIA AI Infrastructure and Operations Fundamentals • Sep 2025	Certificate
IBM Generative AI and LLMs • Apr 2025	Certificate
NVIDIA Networking • Apr 2025	Certificate
AWS Cloud Developing • Dec 2024	Certificate
AWS Cloud Practitioner Essentials • Nov 2024	Certificate

SKILLS

Applied AI & LLMs	LLMs (OpenAI, Claude, Llama) · LangChain · LangGraph · RAG · FAISS / vector search · autonomous AI agents · multi-agent systems · MCP servers / tool calling · prompt engineering · fine-tuning · human-in-the-loop evaluation · agentic workflows · LLM orchestration · embeddings · semantic search · evaluation frameworks · guardrails · context engineering
ML & NLP	HuggingFace · PyTorch · TensorFlow · Scikit-learn · transformers · CNNs · autoencoders · NLP · computer vision · classification
Engineering & Data Delivery & Infra	Python · REST / WebSocket APIs · FastAPI · SQL · Pandas · NumPy · Bash · Git · data pipelines · Jenkins · Groovy · Docker · Kubernetes · GPU/CUDA · AWS (EC2, S3, Lambda, SageMaker) · AI coding tools (Claude Code, Cursor)
Testing & Systems	PyTest · Robot Framework · regression datasets · error analysis · Linux (Ubuntu, CentOS) · Wireshark · PCAP
Practices & Methodologies	Agile · MLOps · LLMops · prompt design & evaluation · error analysis · human-in-the-loop · guardrails · SDLC · CI/CD · code review · Git workflows · technical documentation · problem-solving · collaboration

VOLUNTEER

Volunteer Instructor • Heznek LaAtid "Scientific Excellence", Fureidis High School	09.2025 – present
Teaching Computer Science fundamentals and programming to 40 students.	
Student Tutor • Ruppin Academic Center (Algebra, Python, Discrete Math)	01.2023 – 02.2024
"Perach" Program • Tutor & mentor for elementary school students	2022 – 2025
