SUMMARY

QA Automation Engineer with **2 years** of industry experience building stable, reusable automation frameworks in Python (PyTest, Robot Framework) and running regression, functional, integration, and performance testing across **200–500 test cases** for software GA releases on complex distributed 4G/5G Open RAN systems. Strong in bug reproduction, root-cause analysis, and verifying R&D fixes, plus building lab setups and topologies on a 20+ server environment. Skilled in network and protocol analysis, Linux, virtualization, and Jenkins CI/CD. **NVIDIA Networking and NVIDIA AI Infrastructure certified**. M.Sc. Information Systems & AI (GPA 93).

EXPERIENCE

Parallel Wireless — QA Automation Engineer	09.2024 – present · 2 years
- Designed reusable Python test frameworks (PyTest, Robot Framework) for GA release validation. - Grew automated coverage to 200–500 regression, functional, integration, and performance cases. - Integrated tests into Jenkins/Groovy CI/CD with parallel runs; build-to-deploy 8h → 2h (~75%). - Owned the defect lifecycle: reproduction, root cause, reporting, fix verification, reopening. - Wrote test plans, test strategy, acceptance criteria, and requirement-to-test traceability. - Analyzed L1–L3 protocol behavior with Wireshark, PCAP, iPerf, tcpdump, and KPI dashboards. - Reduced flakiness by isolating environments with Docker, Kubernetes, KVM, and VMware. - Built RF test topologies with spectrum analyzers and channel emulators for 4G/5G Open RAN. - Configured a 20+ server lab: servers, switches, NICs, firewalls, BMC/IPMI, RF equipment. - Shipped AI-assisted test triage to production, cutting manual investigation time for the team. - Hands-on AI: deliver solutions from development to production with measurable impact. - Partnered with R&D in Agile/Scrum on acceptance criteria, defect triage, and quality metrics.	

EDUCATION

M.Sc., Information Systems & AI • University of Haifa	GPA 93 • Expected 2027
Specialization in Artificial Intelligence, Machine Learning, Deep Learning, Big Data Systems, Cybersecurity, and Software Engineering, with applied projects.	
B.Sc., Computer Science • Ruppin Academic Center	GPA 83 • 2022 – 2025
Specialization in AI & Data Science. Coursework in Software Development, Data Science, Machine Learning, and Deep Learning; strong OOP, data structures, and databases.	

CERTIFICATIONS

NVIDIA Networking • Apr 2025	Certificate
NVIDIA AI Infrastructure and Operations Fundamentals • Sep 2025	Certificate
IBM Generative AI and LLMs • Apr 2025	Certificate
AWS Cloud Developing • Dec 2024	Certificate
AWS Cloud Practitioner Essentials • Nov 2024	Certificate

SKILLS

Test Automation & QA	PyTest · Robot Framework · Selenium · Postman · Appium · regression · functional · integration · performance testing · test frameworks · fixtures · parametrization · CI validation · scheduled runs · bug reporting · RCA · end-to-end (E2E) testing · smoke & sanity testing · continuous testing · test coverage analysis · shift-left testing
Languages	Python · C · C++ · Bash · Shell · Groovy · SQL
CI/CD & Tools	Jenkins · Groovy · Git · GitHub Actions · Jira · Agile/Scrum · AI coding tools (Claude Code, Cursor)
Networking & Protocols	TCP/UDP/IP (L1–L3) · Ethernet · VLANs · REST · WebSocket · Wireshark · PCAP · iPerf · tcpdump · KPI dashboards · LTE/5G Open RAN
Systems & Virtualization	Linux (Ubuntu, CentOS) · Docker · Kubernetes · KVM · VMware · BMC/IPMI · servers · switches · RF equipment
AI/ML	LangChain · LangGraph · RAG · vector search · LLM agents · PyTorch · Scikit-learn
RF & Telecom	spectrum analyzers · channel emulators · RF simulation & signal analysis · RF equipment · 4G/LTE · 5G NR · Open RAN · networking protocols · lab equipment (servers, switches, NICs, firewalls)
Applied AI Delivery	end-to-end AI delivery (prototype → production) · LLM agents · RAG · FAISS / vector search · LangChain · MCP / tool calling · prompt engineering · model serving (REST/FastAPI) · containerized deployment (Docker, Kubernetes) · GPU/CUDA · evaluation & error analysis · human-in-the-loop
Practices & Methodologies	test case design · test planning · test strategy · SDLC · STLC · defect / bug lifecycle · defect tracking (Jira) · exploratory & risk-based testing · Agile · Scrum · Git workflows · attention to detail · analytical & problem-solving

VOLUNTEER

Volunteer Instructor • Heznek LaAtid "Scientific Excellence", Fureidis High School	09.2025 – present
Teaching Computer Science fundamentals and programming to 40 students.	
Student Tutor • Ruppin Academic Center (Algebra, Python, Discrete Math)	01.2023 – 02.2024
"Perach" Program • Tutor & mentor for elementary school students	2022 – 2025
