SUMMARY

Software Automation Engineer (SDET) with **2 years** of industry experience designing reusable test automation and tooling for complex distributed 4G/5G Open RAN systems at Parallel Wireless. Builds maintainable Python automation (Pytest, Robot Framework), integrates execution and reporting into Jenkins/Groovy CI/CD, and debugs failures across application, Linux, networking, and infrastructure layers — contributing to an **8h → 2h (~75%)** build-to-deploy reduction. Strong CS fundamentals and AI-assisted failure triage. M.Sc. Information Systems & AI (GPA 93).

EXPERIENCE

Parallel Wireless — Software Automation Engineer	09.2024 – present • 2 years
- Architected reusable Python test-automation frameworks (PyTest, Robot Framework) with shared fixtures. - Powered 200–500 automated cases across regression, functional, integration, and performance. - Drove build-to-deploy from 8h to 2h (~75%) with parallel Jenkins/Groovy CI/CD stages. - Reproduced, root-caused, and drove defect resolution with R&D; verified fixes, prevented recurrence. - Engineered Python/Bash tooling for log parsing, environment setup, and result aggregation. - Shipped 3 AI/LLM tools to production that summarize CI logs and classify recurring failures. - Hands-on AI: deliver solutions from development to production with measurable impact. - Eliminated test flakiness by containerizing environments (Docker, Kubernetes, KVM, VMware). - Debugged over REST, WebSocket, and TCP/UDP with Wireshark, PCAP, iPerf, gdb, and Linux logs. - Automated RF lab workflows with spectrum analyzers and channel emulators for 4G/5G validation. - Built a 20+ server lab: servers, switches, NICs, firewalls, BMC/IPMI, RF equipment. - Mentored teammates on framework patterns and drove code-review standards for the codebase.	

EDUCATION

M.Sc., Information Systems & AI • University of Haifa	GPA 93 • Expected 2027
Coursework in Big Data Systems, Cybersecurity, Software Engineering, Machine Learning, and Deep Learning, with applied projects on real data and distributed systems.	
B.Sc., Computer Science • Ruppin Academic Center	GPA 83 • 2022 – 2025
Specialization in AI & Data Science. Strong foundation in OOP, data structures, algorithms, operating systems, computer architecture, and software development (C/C++, Python, Java).	

CERTIFICATIONS

NVIDIA Networking • Apr 2025	Certificate
NVIDIA AI Infrastructure and Operations Fundamentals • Sep 2025	Certificate
AWS Cloud Developing • Dec 2024	Certificate
AWS Cloud Practitioner Essentials • Nov 2024	Certificate
IBM Generative AI and LLMs • Apr 2025	Certificate

SKILLS

Test Automation	Pytest • Robot Framework • Selenium • Postman • Appium • test framework design • fixtures • parametrization • regression • functional • integration • performance testing • CI validation • bug reporting • RCA • end-to-end (E2E) testing • continuous testing • shift-left testing • test coverage analysis
Languages	Python • C • C++ • Java • Bash • Shell • Groovy • SQL
CI/CD & Tools	Jenkins • Groovy • Git • GitHub Actions • Jira • Agile/Scrum • AI coding tools (Claude Code, Cursor)
Systems & Virtualization	Linux (Ubuntu, CentOS) • Docker • Kubernetes • KVM • VMware • BMC/IPMI
Networking & Protocols	TCP/UDP/IP (L1–L3) • Ethernet • VLANs • REST • WebSocket • Wireshark • PCAP • iPerf • tcpdump • gdb
CS Foundations	OOP • data structures • algorithms • multi-threading
AI/ML	LangChain • RAG • vector search • LLM agents • PyTorch • Scikit-learn
RF & Telecom	spectrum analyzers • channel emulators • RF simulation & signal analysis • RF equipment • 4G/LTE • 5G NR • Open RAN • networking protocols • lab equipment (servers, switches, NICs, firewalls)
Applied AI Delivery	end-to-end AI delivery (prototype → production) • LLM agents • RAG • FAISS / vector search • LangChain • MCP / tool calling • prompt engineering • model serving (REST/FastAPI) • containerized deployment (Docker, Kubernetes) • GPU/CUDA • evaluation & error analysis • human-in-the-loop
Practices & Methodologies	test case design • test planning • test strategy • SDLC • STLC • defect lifecycle (Jira) • test-driven development • Agile • Scrum • code review • Git workflows • CI/CD integration • problem-solving • analytical thinking

VOLUNTEER

Volunteer Instructor • Hezkek LaAtid "Scientific Excellence", Fureidis High School	09.2025 – present
Teaching Computer Science fundamentals and programming to 40 students.	
Student Tutor • Ruppin Academic Center (Algebra, Python, Discrete Math)	01.2023 – 02.2024
"Perach" Program • Tutor & mentor for elementary school students	2022 – 2025
